Each control key calls up a programmed control routine which is executed between refresh cycles of the display. The function of each control key and the display modes can be modified by changing the program, thereby eliminating costly hardware modifications associated with prior art wired logic consoles. This technique consequently allows the display console to readily adapt to Changing system or operational requirements.

the point of birth control or more specifically, control in In 25 years time our present population will have doubled human fertility. This literally means asking child bearers to waive their right to have a child anytime they feel like it, and only bear children when they can be sure that their offspring will be born into an atmosphere of less want.
